The Local Okres, and Kraj National Committees will be managed according to the same principles as the central state administration, beginning 1 January 1950. The financial management of the National Committees will then be a part of the unified state financial structure.

The budgets of the National Committees have a public character and all the citizens have the right to submit memoranda concerning the budgets of the Local National Committees. All the Local National Committees in the okreses have the right to submit memoranda concerning the budget of their Okres National Committees and the same right is reserved for the Okres National Committees when the kraj budgets are involved. This system best guarantees not only proper management of the organs of people's administration but also their auto.cmy.

The National Committees which serve areas with populations of 3,000 or less lack a sufficiently well-developed administrative apparatus. Their work for 1950 has been facilitated to the extend that their budgets will be composed by a simpler method, that is, only according to accounting groups. Other National Committees will estimate their budgetary requirements in accordance with the instructions applicable to the central offices.

INTERNATIONAL RED LRIGADE IN SLOVAKIA -- Munich, Slovenska Republika, Feb 50

It has been reported that members of the partisan units which fought in Greece are concentrated in Slovakia. As of February 1950, there were nearly 10,000 of these partisans, and more are being recruited from all corners of the earth. It is obvious that there are Czechs and Slovaks among them. The partisans are subjected to special training which is to enable them to be used in Yugoslavia to liquidate the Tito regime.
